

Language Enrichment, Articulation, Phonemic Skills

L.E.A.P.S.

Dear Parent,

This summer, like most, you have many choices to make about what you and your family will do. Obviously, if your child was struggling this school year – or even if he did well - you may have concerns about how he will perform next year and may feel he needs or could benefit from some help this summer. LEAPS is designed to help address some of those needs in a fun, camp-style way, but not require too much of your precious summer break with your children. Each area is addressed in separate sessions as listed here:

Language Enrichment:

If your child needs to work on following directions, understanding concepts, comprehension, written expression, or other areas, these sessions will address those areas. From your input, sessions will be tailored to continue and improve the skills he has developed during the school year.

Articulation:

If you have concerns about how well your child says her sounds, whether or not she receives therapy, and would like them to learn ways to improve, these sessions will address those needs.

Phonemic Awareness:

If your child has difficulty breaking down sounds, putting them together, or spelling and/or reading due to these causes, these sessions will address those areas. Your input will help target the areas in which she is struggling.
